PROJECTS & CLIENTS PORTFOLIO · 2026

# Experience built through delivery.

Selected consulting, training, management-system, scientific and technical engagements across regulated and high-impact sectors.

01 · PORTFOLIO OVERVIEW

# Cross-sector expertise. Practical outcomes.

EIG supports organizations from assessment and strategic design through implementation, capability development, audit readiness and sustained improvement. This portfolio presents representative experience while respecting client confidentiality.

## Sectors represented

Pharmaceuticals · Medical Devices · Food & Beverage · Oil & Gas · Petrochemicals · Healthcare · Laboratories · Manufacturing · Steel & Metals · Logistics · Construction · Government

## Our role across an engagement

Diagnose · Design · Develop · Implement · Verify & Sustain — with practical knowledge transfer at every stage.

02 · PHARMACEUTICALS & MEDICAL DEVICES

# From regulated design to operational readiness.

Selected experience across pharmaceutical manufacturing, medical devices, cosmetics, laboratories and controlled distribution environments.

Representative EIG technical, training and management-system activities.

### Sterile Preparations Facilities

Cleanroom and critical-utility design support, qualification planning, GMP readiness and licensing support for sterile operations.

### Medical Devices Manufacturing

ISO 13485 implementation, CE-marking readiness and quality-system support for regulated production environments.

### Cosmetics Manufacturing

ISO 22716 and GMP readiness, process controls and quality-control laboratory development.

### Pharmaceutical Warehousing

Cold-chain validation, GDP-aligned controls and practical supply-chain management systems.

03 · FOOD & BEVERAGE

# Quality protected across every process.

Food-safety and quality engagements shaped around product risk, process control, regulatory expectations and workforce capability.

Representative capability-development and operational-quality engagements.

### Dairy Operations

FSSC 22000 and HACCP implementation with practical support for UHT, filling and hygiene-control processes.

### Beverage Facilities

Water-treatment validation and quality-system support for mineral-water and carbonated-drink filling lines.

### Canned Food Production

BRC readiness, food-safety controls and thermal-process validation support.

### Industrial Bakeries

ISO 22000 implementation, production-flow improvement and competency development for quality teams.

04 · ENERGY & PETROCHEMICALS

# Capability for critical operating environments.

Management systems, professional development and audit-readiness support for organizations operating across Egypt's energy and petroleum ecosystem.

Representative EIG engagement with energy and petroleum-sector organizations.

### International Drilling Material Manufacturing Co. (IDM)

A focused capability-development and qualification engagement for API Q1, 10th Edition.

### Petroleum-Sector Organizations

Integrated ISO 9001, ISO 14001 and ISO 45001 consulting and implementation support across operating sites.

### Fertilizer & Petrochemical Facilities

Internal auditing and improvement support for quality, safety and environmental management systems.

### Energy Industry Engagement

Participation in EGYPES and direct engagement with Egypt's energy and petroleum ecosystem.

05 · DIVERSIFIED SECTORS

# One delivery discipline. Multiple industries.

The same disciplined approach is adapted to each client's regulatory setting, operating risk, strategic priorities and organizational maturity.

Representative engagements across public, industrial and service organizations.

### Healthcare & Laboratories

JCI-related readiness, hospital quality systems and ISO 15189 laboratory qualification support.

### Aviation

Quality-system support for aviation maintenance environments, including EASA Part-145 and AS9100 contexts.

### Construction & Infrastructure

ISO 45001 implementation and occupational health and safety systems for complex project sites.

### Logistics & Warehousing

Quality, security and safety systems, operational controls and team capability development.

06 · FEATURED ENGAGEMENT

# API Q1 capability development for IDM.

A specialized training and qualification engagement on API Specification Q1, 10th Edition, delivered for International Drilling Material Manufacturing Co. (IDM), affiliated with Egypt's petroleum sector.

### Engagement focus

Management-system interpretation, implementation readiness and applied learning for sector-specific requirements.

### Delivery approach

Expert-led instruction, practical discussion and direct connection between API Q1 requirements and operating reality.

07 · INDUSTRY PRESENCE

# Connected to the markets we serve.

EIG maintains active engagement with professional, regulatory and industrial communities. Participation in EGYPES 2026 reflects our connection to the energy ecosystem and our commitment to quality, resilience and operational excellence.

### Industry Dialogue

Direct engagement with decision-makers, specialists and operating organizations.

### Current Perspective

Continual awareness of sector priorities, regulatory developments and emerging operational challenges.

### Practical Networks

Connections that support qualified delivery, knowledge exchange and collaboration.

08 · CLIENT REFERENCES

# Trusted across critical sectors.

Selected organizations from EIG's client and professional network across public institutions, energy, healthcare, manufacturing, laboratories and regulated industries.

- Egyptian Drug Authority
- Egyptian General Petroleum Corporation
- Egyptian Petrochemicals Holding Co.
- Misr Fertilizers Production Co.
- Egyptian Salts & Minerals Co.
- International Drilling Material
- Eni
- General Electric
- Intertek
- TÜV NORD
- TÜV Austria
- Bureau Veritas
- Andalusia Hospitals

09 · WHY CLIENTS CHOOSE EIG

# Expertise that stays after the engagement.

01

### Integrated Delivery

Consulting, training, auditing, advisory, scientific and technical support connected through one accountable team.

02

### Sector Context

International frameworks interpreted around the client's regulation, operating reality and risk profile.

03

### Field-Oriented Support

Systems and capabilities are implemented with teams—not delivered as documents alone.

04

### Knowledge Transfer

Practical tools, methods and competencies remain inside the client organization.

05

### Independent Advice

Evidence-based recommendations focused on client objectives and sustainable value.

06

### Confidentiality

Professional and responsible protection of client information throughout every engagement.

> *"We measure our success by the success of our clients."*
>
